

SURGICAL EQUIPMENT

## Introduction

A surgical instrument is a tool or equipment that is used to execute certain activities or produce desired results during a surgery or operation, such as changing biological tissue or allowing access to observe it. Many different types of surgical instruments and tools have been developed over time. Some surgical instruments are made to be used in general surgery, whereas others are made for a specialised treatment.

## Market Potential

India is one of the top 20 medical equipment markets in the world. In 2020, India's medical device industry was worth US\$ 11 billion, and by 2024, it is predicted to be worth US\$ 65 billion. The Indian medical equipment industry is expected to grow from US\$ 11 billion to US $\$ 50$ billion by 2025.
In the projected period of 2021-2026, the India General Surgical Devices Market is expected to grow at a CAGR of $6.8 \%$.

## Assumptions

1. For SME unit having yearly turnover upto 500 lakhs, the Nayak Committee recommendation has been implemented by all the banks. Hence, we have worked out the funding requirement accordingly.
2. Sales of such trading units is majorly impacted by the selection of business location. The entrepreneur should examine all business aspects while selecting this location. Normally, surgical equipment showroom is established in a prevalent market area. Thus, we have assumed that the unit has been set up in a market area.
3. The shop premises of this unit is taken on lease. 1600 sq. ft . is the proposed area, of which 600 sq . ft . is for office cum showroom area and the rest is for the godown, which shall be spacious for stock display and stock-keeping.
4. Computation of Closing Stock is done on the basis of Working Capital cycle which is assumed to be of 3 months.
5. DSCR is high because of the term loan component is lesser than working capital requirement. We have not considered repayment for working capital and it is running on a continuous basis.
6. Trading of Surgical Equipment is allowed only to the authorised dealers. These dealers usually trade in the open markets since the open markets provide better margin and marketing assistance. The dealers are supposed to have full-fledged knowledge of the equipment.
