

ORGANIC GRAINS AND PULSES SHOP

Introduction

Whole Pulses are processed to produce Split Pulses (commonly known as Dal), which is also at times De-skinned and Oiled for ease of cooking and better preservation. Commonly processed Pulses are Chana (Gram), Mung, Massor, Urad and Arhar (Tur), which are important part of staple diet in all state of IndiaAccording to the Handbook of Agriculture, brought out by the ICAR, Organic farming involves the use of renewable resources and recycling, returning to the soil the nutrients found in waste products. Organic farming respects the environment's own system for controlling pests and diseases in raising crops and livestock without the use of synthetic pesticides, herbicides, chemical fertilizers, growth hormones, antibiotics or gene manipulation. Also meat and poultry production is regulated with particular concern for animal welfare and by using natural foodstuffs. Thus, organic farming differs from modern intensive farming systems as in organic farming farmers use a range of techniques that help sustain ecosystems and reduce pollution.

The Ministry of Agriculture (Department of Agriculture & Cooperation) further added as follows: "As per the National Programme for Organic Production (NPOP), Ministry of Commerce, organic agriculture is defined as 'Organic agriculture is a system of farm design and management to create eco system, which can achieve sustainable productivity without the use of artificial external inputs such as chemicals, fertilizers and pesticides.

Market Potential

The organic food business in India is booming, thanks to increased consumer awareness of the products. Organic food demand is being driven by a rising level of health consciousness in the country. Indian consumers have begun to pay attention to the nutritional content and quality of the food they eat, resulting in an increase in demand for organic food. Furthermore, due to factors such as strong economic growth, urbanisation, and rising income levels, consumer expenditure on health and wellness items has expanded considerably. Furthermore, India's significant government backing is catalysing the organic food sector. The Indian government promotes organic farming.

Assumptions

- 1. For SME unit having yearly turnover of 500 lakhs, the Nayak Committee recommendation has been implemented by all the banks. Hence, we have worked out the funding requirement accordingly.
- 2. Sales of such trading units is majorly impacted by the selection of business location. The entrepreneur should examine all business aspects while selecting this location. Normally, Organic Food Store is established in a prevalent market area. Thus, we have assumed that the unit has been set up in a market area.
- 3. The shop premises of this unit is taken on lease. 300 sq. ft. is the proposed area which shall be spacious for stock display and stock-keeping.
- 4. Computation of Closing Stock is done on the basis of Working Capital cycle which is assumed to be of 1 month.

DSCR is high because of the term loan component is lesser than working capital requirement. We have not considered repayment for working capital and it is running on a continuous basis.

Certifications Required

- 1. Food Safety and Standard Authority of India(FSSAI): FSSAI certificate appeals to the customers that food is verified chemically and is safe to consume. It certifies that food is as per safety standard in turn attracting more customers towards the entity.
- 2. Registration under APEDA(Agricultural and Processed Food Products Export Development Authority): It provide financial assistance for undertaking surveys and feasibility studies, participation in enquiry capital through joint ventures and other reliefs and subsidy schemes. It helps in fixing of standards and specifications for the products of exports by means of packaging as per FIPS (FOUNDATION FOR INNOVATIVE PACKAGING AND SUSTAINABILITY.

- 3. NPOP Certification: NPOP or National Program for Organic Production is a program under the Government of India which provides standards for organic production, systems, criteria and procedures for licensing of Certification Bodies
- 4. AGMARK Certification: Agmark is one such mark that is certified by the Government of India for all agricultural products ensuring consumers of both, their quality and their use.
